

Machine Learning internship

[Introduction](#)[Instructions](#)[Select an Industry](#)[Module 1](#)[Module 2](#)[Module 3](#)[Module 4](#)[Module 5](#)[Module 6](#)[My Jupyter Notebook](#)

Select an Industry

You have been allotted Mahindra

In the coming modules, we will be doing various tasks to analyze and make predictions on allotted selected company stock. You may need to learn about the underlying markets as well to complete the internship.

Below, there is a dropdown of various industries for you to choose from. Browse through all of them and choose the industry of your liking and submit.

On doing so, you'll be allotted a company belonging to the industry you chose and a 'csv' file will be downloaded.

Once allotted, the company stock or the industry cannot be changed, so choose the industry wisely !

Once the stock is allotted, you'd be married to it for the course of this project, from exploratory analysis to accurate future predictions and trade/invest calls!

Data for module 2 onwards

For module 2 onwards, we need to access the data of various other stocks, index and commodities. The links for the same have been provided in this section

[Stocks](#)[Commodities](#)[Indices](#)

Nifty

Nifty is the reference index which is referred to by the investors on a daily basis. The direction of Nifty represents the trend of the market and most stocks tend to move in its direction. In short, Nifty is a benchmark index which comprises of 50 companies from 13 different sectors. These 50 companies are among the largest companies in India and are a proxy for the performance of Indian economy
